PROFESSIONAL SUMMARY

Motivated and detail-oriented Information Technology undergraduate with a strong foundation in Java Full Stack Development, frontend technologies, databases, and software engineering concepts. Passionate about developing AI-powered applications and modern web solutions with hands-on experience in machine learning and full stack projects. Skilled in problem-solving, analytical thinking, teamwork, and creating user-focused applications with scalable and efficient solutions.

EDUCATION

Bachelor of Technology in Information Technology

Mahendra College of Engineering, Minnampalli, Salem (Dt) • CGPA: 7.72 • 2022 – Present

Strong academic foundation in software development, programming, database management, and modern web technologies, while actively working on AI-powered and full stack development projects.

Higher Secondary Education — Computer Science & Mathematics

Government Higher Secondary School, Veppanthattai, Perambalur (Dt) • 73.16% • 2021 – 2022

Developed analytical thinking, logical reasoning, and foundational programming knowledge.

Secondary Education

Sri Ragavendra Matric Higher Secondary School, Veeraganur, Salem (Dt) • 76.2% • 2019 – 2020

Built core communication and problem-solving skills with consistent academic performance.

ACHIEVEMENTS & AWARDS

- Project Expo First Prize — AKT Memorial College of Engineering & Technology, for the “Ocular Disease Identification” project (March 2025).

SKILLS

Technical Skills: Java, HTML, CSS, JDBC, SQL

Soft Skills: Effective Communication, Active Listening, Problem Solving

Productivity Tools: Microsoft PowerPoint, Microsoft Excel

PROJECTS

AI Smart Mirror with Facial Detection <https://69d7f37aac1aa747d41757c2--brilliant-starlight-b9158c.netlify.app/>

- Developed an AI-based smart mirror using computer vision for real-time facial detection and recognition
- Displays personalized information like time, weather, and notifications
- Enhances user interaction with secure and intelligent automation

Research and Development Search Portal <https://spiffy-centaur-87545f.netlify.app/>

- Built a web-based portal to manage and search research equipment and lab resources efficiently
- Implemented advanced search and request features for better accessibility
- Improves resource utilization and user experience

Traffic Violation Detection System <https://69e51e224d633046fe93e401--jazzy-brigadeiros-603870.netlify.app/>

- Designed an automated system using image processing to detect traffic violations
- Captures vehicle details and generates alerts
- Helps improve road safety and reduces manual monitoring

Smart Job Recommendation System <https://v0-smart-job-recommendation-eight.vercel.app/>

- Created a recommendation system that suggests jobs based on user skills and preferences

- Uses data analysis to match candidates with relevant opportunities
- Improves job search efficiency and personalization

House Price Prediction <https://github.com/dhanuprabu/House-price-predictor-7.git>

- Developed a machine learning model to predict housing prices based on location, size, and other features
- Utilized Python and Jupyter Notebook for data preprocessing, analysis, and model training
- Created data visualizations to enhance interpretation for non-technical stakeholders
- Presented project findings using storytelling techniques to maximize impact and engagement

CERTIFICATIONS

- Oracle Certified Foundations Associate — Oracle University
- Java Programming Certificate — Noviga Technologies
